Inspired by European fashion shows, Sandi Prosser designed a holiday ensemble sure to attract attention at every turn. She chose a neutral-tone colorway of Flirt from Prism Yarns

for the rib-stitch tank. The stunning jacket is constructed using stripes from a combination of fibers from Prism Yarns: Symphony, Flirt, and Plume. Symphony is the base yarn, which sets the stage for Flirt and Plume, a beautiful, full yarn that creates a dramatic fur effect.

Design Your Own EVENING BAG

by Margaret Radcliffe

Ideal as a beautiful gift or festive accessory, a tiny elegant bag is the perfect project for the holidays. Follow the guidelines in this article to make your own bag in any size or shape with any yarn at any gauge you like. Construction starts from the point of the flap, which grows until you determine it's the right size. The bag is then worked in a strip down the back and up the front. To finish off, sew the side seams and then attach the straps and tassel.

Choose a Yarn

Select a fancy yarn with an embellishment, like beads or sequins, and a plain yarn in the same weight. For a small bag, avoid bulky yarns that will look out of proportion to the fine detailing. We picked SWTC's Yin and Yang (with sequins). Both are a wool, silk, and bamboo blend. A 50-gram hank yields approximately 165 yards (150 meters).

Needle Selection

For this project, use needles that are two sizes smaller than the recommended gauge of the yarn (see the ball band for gauge). You will also need a set of needles one size larger than the gauge. The labels for Yin and Yang suggest that a size 6 US (4 mm) needle will gauge properly, so I used one set each of size 4 US (3.5 mm) and size 7 US (4.5 mm) needles. You will also need a pair of double-pointed needles in the smaller size.

Other Supplies

Here are a few additional items you need or will find useful for your project: yarn needle, stiff cardboard, and sharp sewing shears.

Pointed Flap

Let's begin with the flap. Using the smaller needles and the fancy yarn, cast on 2 stitches. **Next row:** K1, yo, K1 (3 stitches). **Pattern row:** K1, yo, knit across until 1 stitch remains; yo, K1. Repeat the Pattern row until the flap is as wide as you want the bag to be; stop when there is a multiple of 6 stitches plus 3. The flap on the bag shown is 27 stitches wide. **Next row:** Beginning with a purl row, work in Stockinette stitch until the Stockinette section measures ½" to 1" (1.25–2.5 cm) from the last row of the

Garner stitch flap; end after working a knit row. This section provides enough length for the flap to cross the top of the bag and creates a curled area that helps keep the flap in place. The purl side is the right side of the fabric.

Smocked Back Yoke

You will need to alternate the plain yarn and fancy yarn for this section and use the smaller needles. Begin the Smocked Pattern as follows:

Row 1 (RS): With fancy yarn, K2, * slip 5 with yarn in front (wyif), K1; repeat from * until 1 stitch rem; K1.

Row 2: With fancy yarn, P2, * slip 5 with yarn in back (wyib), P1; repeat from * until 1 stitch rem; P1.

Photo 1: Insert the left needle under the two loose strands on the back.

Photo 2: Purl the strands together with the next stitch.

Row 3: With plain yarn, knit across.

Row 4: With plain yarn, purl across.

Row 5: With plain yarn, knit across.

Row 6: With plain yarn, P4, * insert the left-hand needle under the two loose strands from Rows 1 and 2 (see photo 1) and purl these two strands together with the next stitch on the left-hand needle (see photo 2), P5; repeat from * ending the last repeat P4.

Row 7: With fancy yarn, K1, slip 3 wyif, *K1, slip 5 wyif; repeat from * until 5 stitches rem; K1, slip 3, K1.

Row 8: With fancy yarn, P1, slip 3 wyib, *P1, slip 5 wyib; repeat from * until 5 stitches rem; P1, slip 3, P1.

Rows 9–11: Repeat Rows 3–5.

Row 12: With plain yarn, P1, *purl the loose strands together with the next stitch as before; P5; repeat from * until 2 stitches rem; purl the loose strand together with the next stitch, P1.

Repeat Rows 1–12 of Smocked Pattern until yoke section is as long as desired, ending after completing Row 12. The bag shown on page 16 has two repeats of the smocking. Cut the plain yarn, leaving a tail to weave in later. Continuing with the fancy yarn, purl 1 right-side row, then knit one row.

Bag Bottom

Now we will work the bottom of the bag. The mesh pattern is worked with the fancy yarn and the larger needles. **Pattern row:** K1, yo, K2tog. Repeat the Pattern row on both the right and wrong sides until the bag bottom is the desired depth between the back and front yokes of the bag; end after working a right-side row.

Front Yoke

Change to smaller needles. Continuing with the fancy yarn, purl 1 right-side row and then knit one row. Using both yarns,

repeat Rows 1–12 of the Smocked Pattern until the front yoke is the same length as the back yoke. With fancy yarn, purl 1 right-side row. **Next row (WS):** Bind off all stitches knitwise. Cut both yarns, leaving tails long enough to weave in.

Finishing

Fold the bag in half (front yoke on top of back yoke), aligning the sides of the yokes. Sew each side seam using the plain yarn. Weave in all ends.

Straps

Using the double-pointed needles and fancy yarn, cast on 3 stitches, leaving an 8" tail. Work I-cord until desired length when stretched. Cut the yarn, leaving an 8" tail, then pull the end through all 3 stitches to secure them. Thread the yarn needle with one I-cord tail. Sew the ends of the cord to the upper corners of the bag. Repeat for the other side.

Flap Tassel

Cut two pieces of plain yarn measuring approximately 12" (30 cm) long. Cut a piece of stiff cardboard to the length desired for the tassel. Wrap the fancy yarn around the cardboard 20–40 times, depending on how full you want the tassel to be. Using one of the 12" lengths of yarn, tie the strands firmly together at one edge of the cardboard. Cut all of the wrapped strands of yarn at the opposite edge of the cardboard. Tie the second length of yarn firmly around all of the strands to form the head of the tassel. Pull the ends of this tie through to the center of the cut strands. Trim the bottom of the tassel even. Attach to the point of the flap.

Options

Not least among the attractive aspects of this design is its versatility. You can make a tiny treasure pouch with fine yarn. Transform it into a clutch simply by making the bag wider and shorter and omitting the cord. Make a very tall pouch for a gift bag in which to present a bottle of wine. Substitute a heavy bead, earring, or beaded stitch marker for the tassel. Use something with a little weight to hold down the flap. Look for heavy jewelry chains at thrift stores, yard sales, or flea markets, and use them for straps instead of cording.

Play with the size, shape, yarns, and embellishments. You'll find you can't knit just one!

Variegated Yarn Can Be Too Much

by Lorna Mier

Many of us are addicted to multicolored hand-dyed yarns. In our search for different ways in which to use these inspiring yarns, one thought never seems to cross our minds: "Don't use variegated yarn every time!" I know it's a shocking notion, but I do have some examples of this principle to share with you. You can still use hand-dyed yarns, but for these stitch patterns, subtle, nearly-solid yarns are much more well suited.

Cables

Any time a cable gets "fancy," it's time to back off on the colors a little. While a nice simple XO cable may show up when using a variegated yarn, as the stitches cross and form intricate patterns, too many colors will distract from the cables and crossed stitches. This is true of traveling stitches, Bavarian crossed stitches, and other skinny cables wherein just one stitch does all of the design work. Rather than make it compete with colors, try a hand-dyed solid, which will add unique depth to the stitches without drawing attention away from them. Photo 1 is an example of a narrow diamond-shaped cable with knit and purl stitches making the background. Notice how the shades of green add to the stitch definition.

Photo 1: Green cabled swatch; no pattern given

Knits and Purls

When the overall fabric is Seed stitch, Moss stitch, or some type of ribbing, a variegated yarn will work well. To a certain extent, purl stitches are great for mixing up the colors a little, but when the knits and purls form a design or spell a name, that pattern will be difficult (or impossible) to see. This is another instance where a hand-dyed solid will work well. The light and dark variation of the solid will accentuate the knit and purl design. Choose a yarn with a tight twist to get wonderful stitch definition; this will make the embossed fabric stand out. It helps to choose colors that are light to medium. The embossed blocks in photo 2 use Stockinette stitch, reverse Stockinette stitch, and Seed stitch. The almost-solid periwinkle yarn highlights the texture of the stitches.

Photo 2: Periwinkle embossed diamonds swatch; no pattern given

Lace

Lace is a big favorite with hand-dyed yarn lovers, especially for socks and shawls. It's an easy mistake to see a gorgeous lace shawl worked up in a variegated hand-dyed yarn, grab your favorite variegated hand-dyed yarn, and expect the same results. Next time you look at a hand-dyed lace shawl, study it for these qualities: Is the lace pattern easy to "read"? (One may easily depict a pattern repeat, such as a leaf or weave.) Is it the colorway of a subtle hand-dyed yarn that makes the pattern stand out? The more complex the lace design, the gentler the colors should flow. In other words, either the lace or the color should have top billing. If you try to feature both, it gets chaotic and confusing to the eye. If you absolutely love a fancy lace pattern, use a hand-dyed solid for guaranteed success. It would be a shame to put the effort (and enjoyment) of lace knitting into a project and not be able to really see it through all the colors.

Photo 3 shows a small, but intricate, lace pattern that would be difficult to see if knit in a highly contrasting variegated colorway.

Row 8: Purl.

Rep Rows 1-8 for the Open Lace pattern.

The Butterfly Lace pattern (see photo 4) is another example of intricate placement of yarn overs and decreases to make a lace picture. Its beauty would disappear if knit in variegated colors.

Complement, Not Compete

The moral of these stitch pattern stories is that the fancier or more detailed the stitch pattern, the better to use yarns that have subtle hand-dyed colors (especially solids). Allow the decorative cables, stitch textures, and lace details to be the focal point of your project.

Putting the 'Able' in Cable

by Mary Anne Oger

Cabled garments are classic. If you want a real hand-knit look, cables are the way to go. Producing cables on a knitting machine can present a bit of a challenge though, as many hand-knitting techniques cannot be reproduced without creating more work on the knitting machine than it would take to actually hand knit the piece. But a lovely hand-knit look can be achieved quite quickly on a knitting machine by keeping it simple. The cables in *Cable Gal Cardigan*, the project following this article, are spread out and staggered (as you will see after studying it), but they look complicated and time consuming.

Begin your machine-knit project by choosing the proper yarn. Since we are using a mid-gauge knitting machine, a DK-weight wool knit at T4-6 in Stockinette stitch gives a gauge of 18 to 26 stitches over 4" (10 cm), which makes it an ideal choice for cables. Wool has more give and natural elasticity, which will make crossing of the cables much easier. Alpaca fiber has the same elasticity as wool, along with the added value of true luxury, which makes it a perfect choice for a cabled project.

Make your swatch, let it rest, then block and steam before measuring. Rib stitches will pull the fabric in quite a bit, so the swatch needs to be flattened to get a true reading. To match my gauge, pin the swatch out to the stitch gauge, lightly steam, and let it dry before measuring.

Plan cables so they will be easy to remember, keeping an even number of rows between operations. By beginning with the carriage at the right side and the row counter at 0, all transfers are made only when the carriage is at the right side. Before you even cast on, bring out the required needles and then move the needle butts back in groups (4 together for the 2X2) to see where the cables are. Play with the arrangement as needed so that it will match well at the seams. Remember—you don't want a partial cable at the side seam or a tuck rib on the edge stitch. Two plain stitches are best at the side seam edges, because one will be taken up for the seam and the next plain one from the front will match up with the plain one from the back.

Swatch 1 shows 2X2 cables across the Stockinette stitch fabric. There is no definition between the cables, so the piece looks relatively flat and boring. To add some interest and highlight the cables, it is common to place at least one rib stitch on each side of a column of cables. On a single-bed knitting machine, the knit stitch is made automatically. To get a purl stitch on the right side of the fabric, the stitch needs to be dropped from the needle and reformed with the latch tool. This could be done on every row, but it is much quicker to reform a column once many rows of patterning are knit.

At the beginning of the piece, mark the stitches to be reformed by hanging a yarn tag on each stitch in the row to be changed after the first row is knit. The yarn tag marks the position where the latch tool is placed, and then the stitch at the top of the column is dropped down through all of the rows to the tool. By inserting the tool first, the stitch will not be undone too far and the tool will be in place to begin reforming the stitches back up to the top of the column, either by latching every row, as for a true purl or rib stitch, or by tuck rib, reforming every second row. Once the stitches have been reformed, move the yarn tag to the stitch in the row above the last reformed stitch to indicate the bottom of the next column of stitches to be reformed.

Swatch 1: 2X2 cables

Swatch 2 has different size cables and two methods of defining the cables. There is a 2X2 cable in the center with a 1X2 minicable on either side and then a 3X2 cable and a 2X2 cable at each side. The right side of the swatch has tuck ribs beside each of the cables. Tuck ribs are created by reforming every other row by inserting the latch tool under two bars of the unladdered column of stitches and pulling every second bar through as a purl stitch. The left side of the swatch has single, plain rib stitches dividing the cables. Notice the tuck rib/right side not only shortens or pulls up the swatch length, but it also widens the fabric due to the tucked stitch of the tuck rib. In essence, the tuck rib adds more definition to the cables as well as shortens and widens the fabric. Take the time to execute your swatch; correct swatching is very important.

Swatch 3 shows the final stitch pattern for the *Cable Gal Cardigan*, combining a faggoted lace stitch with the 2X2 cable,

outlined with tuck rib stitches on either side. The faggoted lace stitch is simply the same stitch transferred on every other row the opposite way. On row 2, it is moved one needle space to the right and the empty needle is left in work position. Two rows are knit and then the stitch is moved to the left.

It is easy to keep track of which way the stitch is to be transferred by looking at the row counter. Every row count that can be evenly divided by 4 means that the stitch goes to the left. Notice in the stitch chart for *Cable Gal Cardigan* that every 5th needle is either a tuck rib or a faggoted lace stitch, making it very easy to keep track by simply looking at the needle number strip.

Swatch 2

Swatch 3: Cable Gal Cardigan stitch pattern

For the ease of crossing cables, bring the needles out after crossing so the stitches are behind the latches. This makes it easier for the stitches to be knit correctly. If this does not work for the larger cables, knit the row, unravel the cable stitches, cross the cable, and then hand knit the unraveled stitches.

If cables are all crossed on the same row, it will restrict the width of the piece, so stagger them to avoid this. With cables, what is put down first shows on the knit side of the fabric, so, to make a 3X2 cable look wider, put the set of 3 down first and cross the 2 stitches behind. On the 1X2 cable, I prefer the look of the single stitch on the front side.

Try cables out, experiment with them, and create your own combination!

Yarn Games and More©
www.lastknitterstanding.com

Grab a few knitting friends, tell them to bring along a knitting project, and play this interactive knitting trivia game. Spin the board and follow the directions. A card might ask you what the term DK means. Answer correctly, and knit a row; answer incorrectly, and you will have to rip out a row. Knit the most rows and become the winner! The game pieces are packaged in a sturdy 5" x 5" box, which is the perfect size to carry on a knitting cruise or off to a knitting weekend.

2. Umbrella Swift

Each one is constructed from Forest Stewardship Council-certified birch wood, and the smooth tumble finish on the arms has enough surface texture to hold the yarn well. There is even a table clamp to secure the swift when winding yarn balls. The website features other beautifully crafted products, such as weaving looms, shuttles, bobbin winders, and tools.

Repeat Rows 1–8 for Cables & Lace patt.

STOLE

With MC, CO 45 sts. Knit 2 rows in Garter st. Beg Row 1 of Cables & Lace patt. Continue in patt until last ball is almost finished, end after working Row 3 of patt. Knit 2 rows in Garter st. BO all sts kwise.

Block

Pin to finished measurements. Because the lace patt needs more blocking than the cable edge, pin it out first, measure 15" between the columns of knit sts that form the outer edges of the lace patt. Pin the cables using less tension. Spray with water to dampen; allow to air dry.

FINISHING

Weave in all ends.

Fringe

Cut 90 pieces of A, each 26" long. One way to easily accomplish this is to open up the skein, rotate the colors to your liking, and cut through the entire loop of yarn at top and bottom. You will use all but a handful of the cut pieces.

Attach Fringe

With crochet hook, fold a cut piece in half. Working in the "valley" between the garter ridges at the cast-on and bind-off edges of the stole, insert hook from the WS and pull the fold of the ribbon through a st. Pass the two tails through the loop of the ribbon. Tighten the ribbon around the stole edge by pulling on the tails. Repeat for each stitch in the cast-on and bind-off edge. Trim ribbon ends, if desired.

*GUIDELINES ONLY: The above reflect the most commonly used gauge and needle or hook sizes for specific yarn categories.

**Lace weight yarns are usually knitted or crocheted on larger needles and hooks to create lace, openwork patterns. Accordingly, a gauge range is difficult to determine. Always follow the gauge stated in your pattern.

***Steel crochet hooks are sized differently from regular hooks—the higher the number, the smaller the hook, which is the reverse of regular hook sizing.
